

SOLIDS Handling SUBMERSIBLE PUMPS

Proven Performance

Barnes offers a broad line of engineered submersible solids handling pumps for a wide variety of light to heavy duty wastewater applications. Designed specifically for unscreened raw sewage or industrial waste applications, these pumps are available in 3" to 8" discharge and can handle spherical solids from 1.5" up to 4" in diameter.

With heads to 258' and capacities to 5,400 gpm at 104°F continuous media temperature, Barnes submersible pumps deliver efficient hydraulic coverage. The motors are completely sealed against contaminants, and bearings are lubricated for the life of the pump, significantly reducing maintenance and operating costs.

Applications

When wastewater collection is in a below-grade sump or wet well.

Where construction of a building for above-ground pumping equipment is not practical.

For use in an existing pump station that is subject to frequent flooding due to power failures or leakage.

Where there is limited vertical clearance in an existing station.

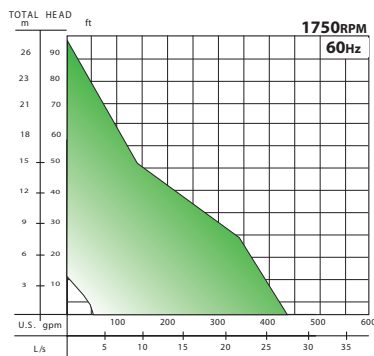

Engineered submersible solids handling wastewater pumps for municipal, industrial, residential & commercial applications. A dependable answer for sewage and waste handling needs.

3SE, 3XSE

Size	3" horizontal/vertical
Motor	.75hp - 3hp oil or air filled
Head	to 95'
Flow	to 440gpm
Volutes	concentric
Impeller	open & enclosed
Solids	1.5" • 2" • 2.5"

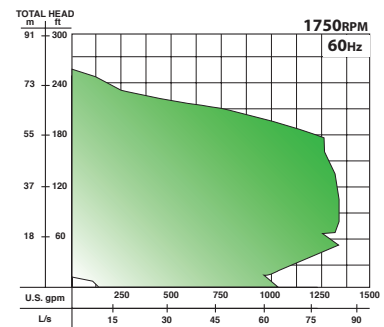

Models with air filled explosion proof motors available.

4SE

Size	4" horizontal
Motor	.9hp - 100hp oil filled or air filled
Head	to 258'
Flow	to 1,265gpm
Volutes	standard concentric high efficiency scroll
Impeller	open & enclosed
Solids	1.5" • 2" • 3"

Models with air filled explosion proof motors available.

Control Panels

Control panels are available in NEMA 3R, 4X, and other enclosures for Simplex and Duplex pumping systems. Standard panels include: 120v control transformers, alternators (in Duplex panels), circuit breakers, motor overload protection, Hand-Off-Automatic selector switch, run lights, alarm circuit, magnetic starters, seal fail light, motor high temperature light. Custom panels available.

Break Away Fittings

Barnes break away fittings allow pump installation and removal without wet well entry or piping disconnection. Break away fittings provide easy access to all Barnes 3" (50mm) through 8" (200mm) submersible pumps; units may be adapted for other submersibles with similar discharge openings. Available in non-sparking design.

Access Covers

Available in multiple sizes in aluminum and steel construction, each gasketed and fitted for use with specific Simplex and Duplex pump systems.

Other Barnes Submersible Pump Accessories*

- Remote alarms
- Fiberglass basins and packaged systems
- Bronze gate valves

* Check with the factory on the availability of additional accessories.

- High water alarms
- Ball check valves
- Simplex and Duplex junction boxes
